2. BATTERY

Warning: Keep C61 far away from the fire.

Battery type	CR2032 button battery
Battery life	About 260 Hours, typical usage
Working temperature range	From -10 ° to 50 °C (14 ° to 122 °F)

As shown below:

Lock the battery cover after the CR2032 button battery installed.

Note :

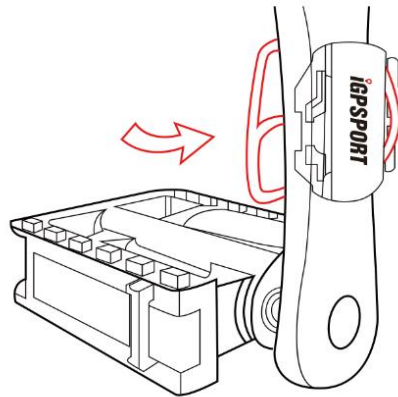

Please put the positive pole of the battery towards the bottom and touch the spring strip tightly.

3. INSTALLATION

Note:

1. C61 should be installed on the crank arm of no-drive side.
2. Rotate the crank to make sure there is no gap between Cadence Sensor and crank. No touch between the Cadence Sensor with your shoes or other part of the bicycle.

3. Start a 15 minutes' riding to test and ensure Cadence Sensor hooked tightly with crank and no harm will caused.

4. PRODUCT MAINTENANCE

As a high tech electronic product, proper maintenance will lengthen the working life.

Cadence sensor:

1. Clean the dust of the surface by a soft brush regularly.
2. Keep the inside of C61 dry while replace the battery.
3. Please do not soak in water for a long time.

Strap:

Wash the strap regularly, make sure there is no crack on it.

5. CONNECT WITH MASTER DEVICE (ANT+ OR BLUETOOTH 4.0)

Steps:

1. Wakeup C61 by rotate to crank arm.
2. Search cadence sensor in master device.

Note:

1. C61 is compatible with standard ANT+ protocol as a cadence sensor.
2. C61 is compatible with Bluetooth 4.0 as a cadence sensor.
